

CS-1000-400 k span Machine

Main Technical Specification of K Span machine, Automatic Building Machine:

Size: 9000mm × 2250mm × 2300mm

Total Weight: about 15000KG

Main Motor Power: 18.5KW forming power is 7.5kw

Bending power is 4.0kw

Cutting power is 4.0kw

Conical power is 3.0kw

Working Speed: Straight sheet: 15m/min

Arch sheet: 13m/min

Sewing: 6m/min

Material of rollers: 45# steel, quenched HRC 58-62

Material of roller shafts: 45# steel, adjusted

Material of cutting blade: Cr12 steel (Taiwan Airline Technique)

Step of rollers: 13 steps

Feeding Width: 1000mm

Effective Width: 400mm

The depth of the groove: 253mm

Thickness of the coil: 0.6-1.5mm

Operating factor of the panel: 40%

Proper span: ≤40m

Founded in 1992, Changsheng is an experienced Arch Roof Forming Machine in China. Our arch sheet forming machine helps you construct buildings in an economical manner. The arch sheets produced by our ultimate building machine have the features of great strength, self-locked installation and excellent waterproof performance. What is more, they can be produced at worksite, greatly lowering the cost.

We provide Arch Roof Forming Machine of various specifications for you to choose from. At Changsheng, we use our own steel construction machines to do steel structure projects at home and abroad, so we can give you complete technique support for machines and projects.

Please contact us if you have a need for any of our Ultimate Building Machine k span roll forming machines, PU sandwich panel machines, automatic tube bending machines, or for any support.
